Art Unit:2817

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23 and 25-32, drawn to a plasma apparatus, classified in class 315, subclass 111.21.
- II. Claim 24, drawn to a simulated RF source, classified in class 327, subclass 100.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not claim the specifics set forth in the subcombination namely the solid state switch and the output stage. The subcombination has separate utility such as for use in testing equipment and transmitting equipment.

Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is (703) 308-0956.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Michael Shingleton whose telephone number is (703) 308-4903.
